

# Handle Installation Instructions

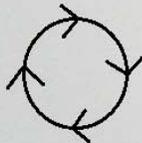

**3**

**Insert Handle Assembly into the large hole in the door frame.**

**Line up Spring end with slot in the door frame when installing handle.**

**Be sure to grease all mating surfaces before installing handle.**

**Rotate handle clockwise and install other half of handle. Also be sure to grease surfaces first.**

**4**

**Install Stainless Steel screw and washer, cycle handle open and closed several times then re-tighten screw. Apply lock tight to screw threads for a more secure installation**

**May Need to bend handle slightly in or out for a smooth operation**
